RISER - The leading Source for Address Verification in European Public Registers

Borders within the EU member states are opening more and more. As a result companies are looking increasingly for people who live within these borders. However, verification of addresses in a foreign country often means facing complex regulations and language barriers. RISER changes this by offering a central online service that enables companies to request and verify address information in a simple and cost-effective way.

OUR SERVICE

RISER offers address information from official European population register. The requested address information contains full name and actual address.

ELECTRONIC SERVICE

Customers make their address inquiries through the central RISER web portal. RISER routes the inquiry to the appropriate registry office, ensuring optimum conditions for each inquiry. The RISER service offers the functionality of checking the state of your inquiry at all times. When orders are completed RISER informs the customer via email.

THROUGHOUT EUROPE

RISER has access to registry offices from of Austria, Estonia, Germany, Hungary and Ireland, Lithuania, Sweden and Switzerland. It is not always possible to access a national civil registry (e.g. Ireland) and

in some EU countries, inquiries need to be directed to local or regional registries (e.g. Germany). Each national inquiry therefore involves specific requirements for RISER.

RISER strives to make the results of the applications available as soon as possible. However, the service is dependent on its suppliers and differences in processing times should be expected in Germany. Being one of the first Trans-European eGovernment services for business administration, RISER's objective is to extend to all accessible EU Member States.

RISER is supported by the eTEN-Programme of the European Commission.
