

The Leading Source for Address Verification in European Public Registers

RISER offers a central online service that enables companies to request and verify address information throughout Europe in a simple and cost-effective way. Through a central web portal, address verification can be performed from official population registers inquiring into Austria, Estonia, Ireland, Italy, Germany, Hungary, Lithuania, Sweden, Switzerland and the United Kingdom. The service offers maximum coverage of the civil registries that are accessible online, thus establishing one of the first trans-European E-Government services for companies.

OUR SERVICE

RISER offers address information from official European population registers. The requested address information contains a full name and valid address.

✓ **Cost Effective**

✓ **Easy to Use**

✓ **Reliable Sources**

✓ **Electronic Service**

✓ **Throughout Europe**

RISER ID CHECK

The RISER ID Check enables you to check if a person with a supplied address is listed in an official population register. Required data for this service are: family name, first name, gender and address of the requested person. If the requested person can be unambiguously identified in the population register, you will receive confirmation that the requested person is, or was, officially registered at the provided address unless the person is registered as deceased.

RISER AGE CHECK

The RISER Age check enables you to verify the supplied age of a person. This is specifically needed for legal age verification in the area of protection of minors. The requested person will be checked in the population register on the basis of his first name, family name, gender and date of birth. If the requested person is unambiguously identified in the population register, then you can be sure that the supplied date of birth is correct.

THROUGHOUT EUROPE

In some EU countries, inquiries need to be directed to local or regional registries (e.g. Germany). Each national inquiry therefore involves specific requirements for RISER.

RISER strives to make the results of the applications available as soon as possible. However, the service is dependent on its suppliers and differences in processing times should be expected when querying into Germany. Being one of the first Trans-European eGovernment services for business administration, RISER's objective is to extend to all accessible EU Member States. RISER is supported by the eTEN Programme of the European Commission.

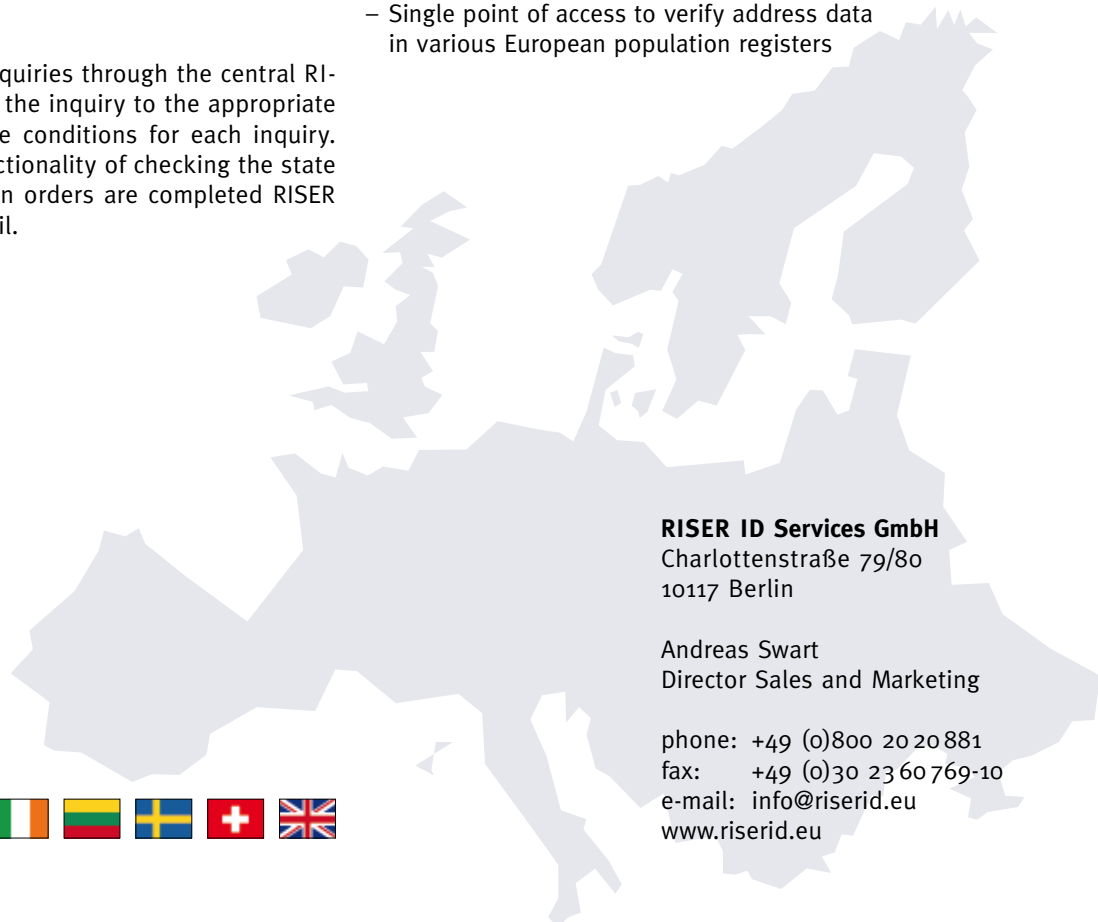

ELECTRONIC SERVICE

Customers make their address inquiries through the central RISER web portal. RISER forwards the inquiry to the appropriate registry office, ensuring effective conditions for each inquiry. The RISER service offers the functionality of checking the state of your inquiry at all times. When orders are completed RISER will inform the customer via email.

BENEFITS TO THE USER

RISER provides convincing benefits to its customers such as lawyers, banks, insurance agencies, eCommerce Provider and credit agencies:

- Easy-to-use uniform access to the service in different languages
- Faster processing of the required data than the traditional paper based processing
- Less effort required to complete in or file the electronic form
- Improved quality of public service
- Cost Effective
- Single point of access to verify address data in various European population registers
